He immediately followed it up by again targeting fans for killing rock, however.Also, music fans shifted away from illegal music downloading quite a long time ago and that has mostlyĀ Āransitioned toward on-demand services, such as YouTube, Spotify, Apple Music, Tidal, Deezer, Amazon Prime Music, Bandcamp... you get the point. Music is available at subscription rates in countless places, though it is worth acknowledging the royalty rates artists are paid for streams are quite piddly.Sure, pirating music cratered album sales, but what is often left out of this discussion is that CD prices had soared to absurdly greedy totals of nearly \$20 per album in the early 2000s.Complaining about illegal music downloading in 2022 is excruciatingly outdated and, if anything, signals that Simmons has simply failed to adapt to changes in the industry or just stubbornly refuses to. It's a tad befuddling because KISS, musically, always made sure to keep up with the times. That's how we got a hit disco song in 1979, after all. Even the return-to-their-roots sound of late career albums were perfectly in line with trends for bands who were in similar stages of their careers.For such savvy businessmen, why haven't KISS been able to weaponize the modern music climate for maximum benefit? Sure, blame it on the fans, that's the easy way out...Back to Gene Simmons for More... ʹPoint to a new look. I played this game before
